

Become *Vocal Local!*

As globalism transitions from global to local we become ***Vocal Local!*** blocking the globalist agenda right where we are in our towns, cities, counties and states.

This is not meant to give place to the globalists earlier maxim, “Think global. Act local.” far from it. To become ***Vocal Local!*** is the antithesis of, even the very nemesis of *globalism*.

Countering the craft and guile of the change agent’s use of voluntary compliance and affirmative action to effect implementation through public buy-in, ***Vocal Local!*** exposes the socio-economic, political and theological underpinnings of the globalist safety cult agenda.

Exposing globalist *localism* propaganda, ***Vocal Local!*** reveals the true nature of public private partnership as ought but a naked move toward corporate fascism.

Wherever it is attempted, ***Vocal Local!*** refuses to accept international, federal or state grants-in-aid realizing that whenever a people reach out for unearned shekels, the shackles of control are inevitably clamped on.

A truly informed, bold, ***Vocal Local!*** people understand that it is a far easier task to block *globalism*, by whatever name it be hidden, as it seeks to gain a foothold locally than it is to excise once it has become lodged in an unsuspecting host, metastasizing thence within the very body politic.

Just say NO! Become ***Vocal Local!***

-William B. Roberts, 2008
